

Case Study

We have powerful and comprehensive point of sales software to control and manage the retailing market for the retailer from stores, bars, restaurants, kitchen, UniKey provides the best solution to control and manager our software.

UniKey Standalone with one remote access —

A perfect solution for mini network working situation.

Background

For stores, bars, restaurants, cafeterias, coffee shops, to streamly manage and control the system is not enough, they are trying to simplify operations and maximize efficiencies, perform a vast range of transactions, reduce staff training cost, remain gust loyalty, increase repeat business

Software

The point of sales software can smartly performs merchandise planning, inventory management, employee controlling, customer relationship management with enhanced features like, searching manufacture's number, products immediately, retrieve customer information by name, phone number, track personal shipping history, low stock alert, create sales report instantly.

Technical requirement

Working background in a store, a server with a workstation.

The store operation, let us assume that the store operation is loaded on the server of a small network, the dongle is on the workstation, which means the dongle is locally attached. Once the dongle is plugged in, the server will validate the license to the workstation. The problem is, with people coming and going alongside, the dongle is easily to be lost.

A standalone dongle can only works in field, while a network dongle is kind of extravagant for a situation of a server and a workstation

Solution—UniKey Standalone with a remote access

The standard UniKey can also work on the network, but it can only accept one remote client/access. (It is good for demo and special customer who need only 1 license).

In a store with a workstation and a managing server, UniKey is plugged in the server. When the workstation is running, UniKey in the sever recognizes it and give the authorization.

Benefit

- UniKey standalone can accept on remote access
- Perfect solution for one-station-one-server working situation.
- Saving money from using network dongle.
