

# Guide for UniToken WebAuthentication

## Deamon Tool

UniToken Daemon Tool is a GUI application running on the user's computer. This tool will be distributed together with the UniToken Pro device to users. It provides many useful functions including logon interface, System setting and change user password.

### Getting started

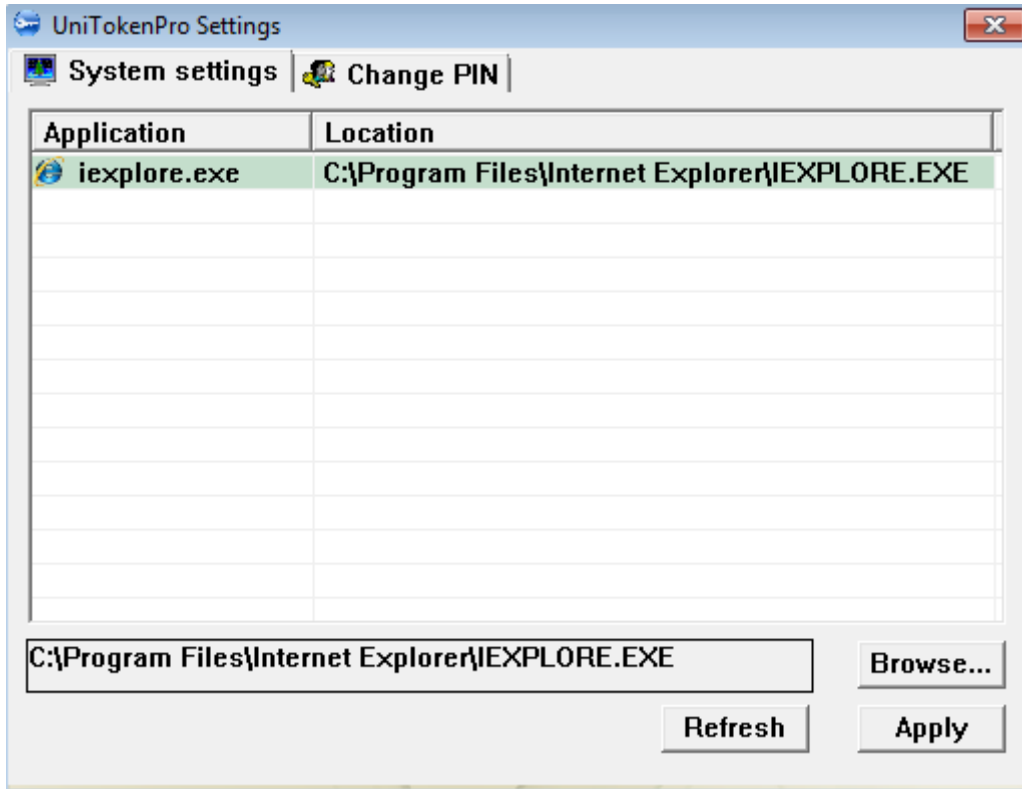

1. Double the UniToken Daemon Tool icon.

2. A User Logon window will appear, enter user PIN.

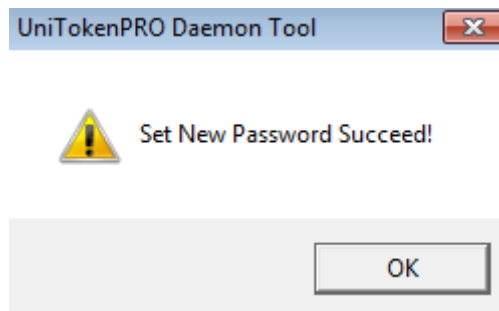

**NOTE!** The User ID displays in the above window are the Unitoken ID.

3. If you logon UniToken successfully, an icon will appear in the notification area at the right side of taskbar.
4. Click the icon, UniToken settings window will appear.

Select the browser you want to use, and then click Apply to execute.

Users can also reset their logon password by using this tool. Click Change PIN tag, on top of the pane, and then enter old PIN, New PIN and Confirm respectively. Click Submit to finish setting.

**Congratulations!** You have reset your PIN successfully if you see the above window appear.
